MG5 EV Long Range

Europe's first fully electric, fully loaded estate car

The new MG5 EV Long Range gives you more on every level. Whether you're taking off with the family or hitting the road on business, Europe's first fully electric, spacious and feature-filled estate gives you room for everything you need. There's also as much as 403 kilometres* of range to get you there, as well as a host of features to

make the journey easier – including our innovative MG Pilot driver assistance technology.

One of the most reassuring features of the new MG5 EV Long Range is our 7 year warranty, giving you peace of mind journey after journey.

*MG5 EV range is 403 kilometres on the new WLTP combined test cycle and 538 kilometres on the WLTP city test cycle.

At a glance

Big on space

We all need personal space, and the MG5 EV Long Range has plenty to offer.

Up to five passengers can travel in comfort, while the boot has ample room for everyone's luggage. There's 464 litres with the load cover in place, or 578 litres with it retracted. Drop the 60:40 folding seat and you've got 1,456 litres for everything from large boxes and bikes to sports gear.

Big on range

Once you're ready to hit the road, the 61.1 kWh MG5 EV Long Range battery can take you up to 403 kilometres* on a single charge.

You won't spend too much time powering up either, with the battery able to charge from 10% to 80% in under 40 minutes, using a 100kW CCS rapid charger.

Big on features

The MG5 EV Long Range keeps you connected and in control.

The 8" colour touchscreen features Apple CarPlay™, Android Auto™, reversing camera and sat-nav. Not to mention MG Pilot, our high-tech suite of driver assistance technology to give you more confidence and safety on the road.

Built for business or leisure

The new MG5 EV Long Range is designed for everyday life, but it's by no means ordinary. With generous boot capacity and a roomy cabin, your passengers can relax while it easily handles the load.

Whatever you need to transport, the new MG5 EV Long Range takes it all in its stride. From suitcases to bulky boxes, musical instruments to double buggies, you can move more in one go. And if the load is larger than normal, just drop the back seats and take advantage of 1,456 litres of space.

The spacious boot still leaves room for back seat passengers, who can enjoy plenty of head and legroom, even behind a taller-than-average driver.

In the front seat, you can get comfortable with the six-way adjustable driver's and four-way adjustable passenger seats.

Plus, there's cloth upholstery on the Excite; or leather-style upholstery, heated front seats and driver's lumbar support on the Exclusive.

Ready to go the distance

Once you load up, sit back and start your journey, the new MG5 EV Long Range can keep going for 403 kilometres* on a single charge of the 61.1 kWh battery.

When it's time to power up, you'll have 80% battery charge in just 40 minutes using a 100kW CCS rapid charger. Enough time for a quick coffee.

You can charge your new MG5 EV Long Range however it suits you. Charge overnight at home on a standard 7kW home charger; or if you need a boost while you're travelling, take advantage of the growing network of charge points

across Ireland. You'll easily find the CCS and Type 2 ports in the front grille.

The MG5 EV Long Range has also been designed with smart features to make the most of your range. The three levels of regenerative braking increase efficiency and optimise battery charge. And with Eco, Normal and Sport driving modes, the MG5 EV Long Range can adapt to your journey and driving style.

Smart features for a more satisfying drive

From the electric powertrain upwards, the new MG5 EV Long Range is loaded with features that make your journey easier, smarter and safer.

Drive easier

Keyless entry and push button start make setting off simple. On the road, the 8" colour touchscreen puts DAB radio, Bluetooth, USB ports, sat nav, air con, Apple CarPlay™ and Android Auto™ all at your fingertips - so you can keep track of the traffic in between your favourite podcasts or albums.

Drive safer

Our advanced MG Pilot driver assistance technology gives you the added confidence of state-of-the-art warning and alert features. It includes Adaptive Cruise Control to maintain a safe distance from the car in front; as well as Active Emergency Braking, Lane Keep Assist, Traffic Jam Assist, and Intelligent High Beam Assist that automatically dips the headlights when they detect an oncoming driver.

LOW RUNNING
COSTS

ZERO
EMISSIONS

Driving down running costs

Whether you're driving the family or on the road for business, you can look forward to low running costs with the new MG5 EV Long Range. In fact, at current electricity prices, you can cover each kilometre for just two cents.* Businesses and drivers can also avail of discounted tolls, which can be up to 75% off in off-peak times.

Business and fleet buyers can benefit from 0% Benefit in Kind (BIK), meaning that company car drivers can make big savings. The company car drivers can also avail of a grant (up to €600) from SEAI for the installation of a home charger.

Businesses can avail of Accelerated Capital Allowances (ACA) in the year of purchase to write off the full allowable cost of the vehicle against their profits if they wish.

*A full charge (61.1kWh) will cost €7.03 at the night rate domestic electricity price of €0.1151 per kWh. With a total combined range of 403 km, this equates to 1.7 cents per km. A full charge at the standard domestic price of €0.2133 per kWh would cost €13.03, which equates to 3.2 cents per km. Electricity prices quoted from Electric Ireland as at 05.08.2021.

MG Pilot

The MG Pilot suite of high-tech driver assistance technology gives you added confidence on the road. A selection of warning and alert features assist the driver, maintaining safety and simplifying everyday driving.

Adaptive Cruise Control (ACC)

Adaptive Cruise Control monitors the road ahead. As long as the road ahead is clear, ACC maintains the speed set by the driver. If the system spots a slower vehicle within its detection range, it gently reduces speed by reducing motor power or actively engaging the brake control system. If the vehicle ahead speeds up or changes lanes, ACC automatically accelerates back to the driver's desired speed.

Intelligent Speed Limit Assist

The car will actively detect speed limit signs and alert the driver of the current speed limit by way of a symbol on the driver's instrument cluster. The symbol acts as a reminder to the driver, reducing the risk of exceeding the speed limit.

Intelligent High Beam Assist

When the headlight high beam is set to the AUTO position, the system automatically switches to low beam when it detects a vehicle ahead. This enables drivers to maximise the use of high beam, making night-time driving safer, without the risk of dazzling oncoming traffic.

Active Emergency Braking (AEB)

At speeds below 19 km/h, the car will automatically apply its brakes to avoid a collision with a vehicle, bicycle or pedestrian. At speeds above 19 km/h, AEB will reduce the likelihood or mitigate the severity of an accident.

Lane Keep Assist (LKA)

Lane Keep Assist uses a camera to detect lane markings ahead and monitors the vehicle's position in its lane. When the function detects the vehicle is

about to unintentionally move out of its lane, it applies a subtle corrective steering input to keep the car within its lane. The driver may also select an alternative Lane Departure Warning, where the vehicle will warn the driver of an imminent lane departure by means of a visual, audible and steering wheel vibration but will not perform a corrective input.

Traffic Jam Assist (TJA)

When Adaptive Cruise Control is turned on, Traffic Jam Assist continuously analyses the speed of the surrounding vehicles and compares it with its own driving speed. If the system detects dense traffic or a traffic jam at speeds below 56 km/h, the driver can activate TJA. The car will automatically follow the vehicle in front, controlling its acceleration, braking and steering within the same lane.

Aftercare

7 year warranty

Lasting peace of mind comes as standard with every MG. The new MG5 EV Long Range offers the reassurance of our full 7 year / 150,000 kilometre warranty, which includes the lithium-ion battery.

Our warranty ensures that expert MG technicians will always be able to keep your car in the best of health. It's also fully transferable to future owners.

Our family

The new MG5 EV Long Range is part of our dynamic, forward-looking family of cars. We offer two other electrified models: the MG ZS EV full battery electric SUV, and the MG HS Plug-in Hybrid, our first plug-in hybrid SUV.

All new MGs offer the reassurance of our 7 year warranty and the friendly expert support of our nationwide network of professional, experienced dealers.

Book a test drive today

Get behind the wheel of the new MG5 EV Long Range and experience the space, efficiency and smart features first-hand. Book your test drive at your MG dealer today or online at:

MG5 EV LR TYRE ENERGY LABEL

Tyre energy labels provide a clear and common classification of tyres performance for rolling resistance, braking on wet surfaces and external noise. The energy efficiency class ranges from A (most efficient) to G (least efficient). The wet grip class also ranges from A (shorter braking distance on wet asphalt) to G (longest). The external noise class ranges from A (less noise outside the vehicle) to B (more noise, with noise levels in the C class no longer allowed).

Standardised tests are carried out to assess the performance of tyres in all the 5 parameters indicated in the label. The QR code, read with a smartphone or other suitable reader, is intended to provide additional information from a European Commission database.
