<sup>0</sup> The CO<sub>2</sub> emissions test figures shown in the table do not express or imply any guarantee of the emissions or fuel economy the car in question. All the figures are based on tests conducted on vehicles with standard wheels and tyres. Optional or Accessory wheels and tyres may have an effect on the emissions or fuel consumption of a vehicle. For further information on CO<sub>2</sub> and fuel performance please refer to our Fuel and Performance section.

† Recommended 'On the road' price includes first year road fund licence, DVLA first registration fee and an estimated £25 for number plates.

\* Not applicable to retail or private car buyers. Benefit In Kind (BIK) values are the monthly taxation payment applicable to company car users. BIK values were correct at the time of printing and are based on taxation rates for 2020/21 tax year. P11D value is the sum of Recommended price + VAT & Number plate charge (£25)

If a car's list price is over £40,000 (including VAT and factory fitted options) at first registration, the customer will pay an additional VED charge (currently £310 for Petrol and £320 for Diesel) for five years after the end of the first registration (in addition to the standard VED charge per year, currently £145). Pure Electric Vehicles are exempt from this additional VED charge.

∞∞∞ - The battery capacity figure specified is the usable capacity determined by Ford and used to calculate the stated Mustang Mach-E performance and battery durability. The figure shown in brackets is the installed capacity as defined by the battery manufacturer.

## NEW MUSTANG MACH-E FUEL CONSUMPTION & PERFORMANCE

The fuel consumption and CO2 emission figures shown in the table are derived from the Worldwide Harmonised Light Vehicle Test Procedure (WLTP). These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted, variations in weather, driving styles and vehicle load. The figures shown are for comparability purposes; only compare fuel consumption and CO2 figures with other vehicles tested to the same technical procedures.

You can also use Ford's online configurator to build and customise a new Ford vehicle: [www.ford.co.uk/configurator](http://www.ford.co.uk/configurator). The configurator provides information about your configured vehicle's fuel consumption and CO2 emissions (these are also WLTP test figures). The figures shown are for comparability purposes; only compare fuel consumption and CO2 figures with other vehicles tested to the same technical procedures.

Engine (Installed)	Available On	Euro Emissions	Transmission	Drive	Maximum Power PS (KW)	Torque Nm	Range Miles	Combined Energy Consumption kWh/100km	Fuel Economy (mpg)	Efficiency Rating	Max Speed (mph)	0-62 mph (secs) Rolling start / (Standing start)	High Powered Charging (KW)	10-80% Charge (mins)
68kWh (75kWh) Standard Range	RWD	Zero Evaporated Emissions	1 Speed Automatic	RWD	269PS (198kW)	430	273	17.2	N/A	A+	111	6.1 / (6.9)	115	38
68kWh (75kWh) Standard Range	AWD	Zero Evaporated Emissions	1 Speed Automatic	AWD	269PS (198kW)	580	248	19.5	N/A	A+	111	5.6 / (6.3)	115	38
88kWh (98kWh) Extended Range	RWD	Zero Evaporated Emissions	1 Speed Automatic	RWD	294PS (216kW)	430	379	16.5	N/A	A+	111	6.2 / (7.0)	150	45
88kWh (98kWh) Extended Range	AWD, First Edition	Zero Evaporated Emissions	1 Speed Automatic	AWD	351PS (258kW)	580	335	18.7	N/A	A+	111	5.1 / (5.8)	150	45

o Ford test figures.

o The declared Fuel/Energy Consumptions, CO2-Emissions and Electric range are determined according to the technical requirements and specifications of the European Regulations (EC) 715/2007 and (EU) 2017/1151 as last amended. Light Duty Vehicles type-approved using the World Harmonised Light Vehicle Test Procedure (WLTP) have Fuel/Energy Consumptions and CO2-Emission information for both New European Drive Cycle (NEDC) and WLTP. WLTP is a new, more realistic test procedure for measuring fuel consumption and CO2 emissions and will fully replace the NEDC latest by end of the year 2020. The applied standard test procedure enables comparison between different vehicle types and different manufacturers. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel/energy consumption, CO2 emissions and electric range. CO2 is the main greenhouse gas responsible for global warming. A guide on fuel economy and CO2 emissions which contain data for all new passenger car models is available at any point of sale free of charge or can be downloaded under <http://carfueldata.dft.gov.uk>.

† Based on full charge. Estimated range using Worldwide Harmonised Light Vehicle Test Procedure (WLTP). Actual range varies with conditions such as external elements, driving behaviours, vehicle maintenance, and lithium-ion battery age.

o - The battery capacity figure specified is the usable capacity determined by Ford and used to deliver the stated Mustang Mach-E performance and battery durability. The figure shown in brackets is the installed capacity as defined by the battery manufacturer.

†† Achieved using high power charging. Time dependent on charging conditions, battery temperature and size as well as ambient temperature at point of use.

††† Ford test data based on testing methodology using 1-ft rollout i.e. from a rolling start. Figures shown in brackets are based on Ford test data based on testing methodology from a stationary start.

# ELECTRIC TECHNOLOGY

## Which electric engines is right for you?

### MILD HYBRID (MHEV)

A small electric motor that helps improve efficiency versus a conventional internal combustion engine. Mild Hybrid vehicles have two sources of power that work together – a conventional engine and a battery-driven electric motor. The electric motor does not power the car. It simply assists it.

### HYBRID (HEV)

Hybrid vehicles have two sources of power. They can automatically switch between conventional mode, pure electric mode (for short distances) or use both to power the vehicle as needed.

### PLUG-IN HYBRID (PHEV)

Plug In. Charge up. Improves Efficiency versus a mild hybrid or hybrid engine. Plug-in Hybrids have the two sources of power like a hybrid, but with a larger high voltage battery, enabling you to drive longer distances on all-electric power.

### ALL-ELECTRIC (BEV)

100% Electric. Just charge it up and go. All-Electric cars are powered by electricity alone. This means they have to be charged before you can drive.

## Electric range

\* Ranges are estimates only and depend on the vehicle, road conditions and driving behaviour.

## Charging the battery

### MILD HYBRID AND HYBRID

There's no need to plug in your vehicle for charging. Hybrid vehicles are able to recharge the battery in two ways:

- 1) Regenerative braking
- 2) Conventional engine

The conventional engine powers the generator which transforms mechanical energy into electrical energy to charge the battery.

All four electric vehicle types use regenerative braking to charge the battery. While braking, the motor is still spinning even though the car is trying to slow down.

### PLUG-IN HYBRID

The larger battery in Plug-in Hybrids can be plugged-in to charge. Once the battery is depleted, the vehicle behaves like a conventional hybrid with the engine running when required.

### ALL-ELECTRIC

All-Electric vehicles are powered by electricity alone and don't have a petrol engine. They must be plugged in to charge the battery.

Regenerative braking captures this typically wasted energy to create electricity, which charges the battery.

## Plug in charging options

### 230V Wall outlet

Plug-in Hybrids and All-Electric vehicles can be charged on a 230V outlet, which is the standard electrical socket in most UK houses. This takes longer than when using a Wallbox.

### Wallbox

For faster charging at home you can install a compatible wallbox, which is capable of charging your vehicle overnight.

### Public charging stations

Public charging stations, available in many cities and work places, can charge your vehicle much faster than at home. They can deliver an 80% charge in just 30 minutes. The price and charging capability can vary.

### IONITY High-power charging stations

400 charging stations will be capable of delivering faster charging of up to 350 kWh per hour across Europe (charging speed dependent on other factors including vehicle charging capability). These stations will be compatible with both current and future Ford all-electric vehicles. These are currently being built.

## 'MANUFACTURERS RECOMMENDED ON THE ROAD' PRICES INCLUDE

	CO <sub>2</sub> Emissions (g/km)*	Number Plates (Estimated) £	Government First Registration Fee £	First Year Vehicle Excise Duty (VED) (Petrol) £	First Year Vehicle Excise Duty (VED) (Diesel) £	Total £
A	0.00	25.00	55.00	0.00	0.00	80.00

The Vehicle Excise Duty (VED) charged on new cars is based on their engine's CO<sub>2</sub> emissions\* (expressed in grams per kilometre (g/km)). All CO<sub>2</sub> emissions figures in g/km are derived from the Worldwide Harmonised Light Vehicle Test Procedure (WLTP). These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted, variations in weather, driving styles and vehicle load.'

You can also use Ford's online configurator to build and customise a new Ford vehicle: [www.ford.co.uk/configurator](http://www.ford.co.uk/configurator). The configurator provides information about your configured vehicle's fuel consumption and CO<sub>2</sub> emissions (these are also WLTP test figures).

The chart above shows the Bands and the VED which will be levied (for vehicles registered from 1st April 2020 onwards).

If a car's list price is over £40,000 (including VAT and factory fitted options) at first registration, the customer will pay an additional VED charge (currently £325) for five years after the end of the first registration (in addition to the standard VED charge per year, currently £150). Pure Electric Vehicles are exempt from this additional VED charge.

For any more information about any of the included Ford Accessories, or to view a full range of Ford Accessories visit [www.ford-accessories.co.uk](http://www.ford-accessories.co.uk)

This price list shows both original Ford accessories as well as a range of carefully selected products from third party suppliers, identified under that third party supplier's brand name. Please note that third party supplier branded accessories do not come with a Ford warranty but are covered by the third party supplier's own warranty, the details of which can be obtained from your Ford Dealer.

Fitment of accessories may have an impact on your vehicle's fuel consumption.

Prices do not include fitting unless otherwise stated. Please refer to your Ford Dealer for fitted prices.

# FORD PROTECT Mustang Mach-E

Every new Ford car is protected by a 3 year/60,000 mile Ford Warranty. In addition, it will also come with Ford Assistance for 1 year, providing roadside assistance in the UK and throughout Europe.

Every new Mustang Mach-E Battery is protected by a 8 year/100,000 mile Ford Warranty.

## Ford Protect Service Plan Plus - Service and extended warranty packages

If you plan on keeping your car for longer than 3 years or you would like to take out a service plan that covers your expected service costs, we have a range of extended warranty and service plan packages available to suit your requirements:

Service Plan Plus Features:

- Scheduled Servicing; covers scheduled servicing in accordance with Ford Standard Service Schedules including associated parts and labour, for the number of services applicable to your plan.  
The Mandatory Annual Inspection, if applicable to your vehicle and replacement brakefluid (every other year)
- Extended Ford Assistance; roadside assistance in the UK and throughout Europe including Rescue Charging, Wallbox Assistance
- Vehicle Hire; for up to 7 days

Wear and Tear Features:

- All items covered within the Service Plan Plus and in addition:  
Brake Pads/shoes/discs; Clutch friction plate; Shock absorbers; Silencers; Wiper Blades; Bulbs
- **Exclusions:** Tyres; Interior trims; glass, seat covers; pads; frames; springs; headrests, seat belts; sheet metals, water ingress, body seals and aerals. Bodywork and paint check and Air conditioning check.

Extended warranty features

- Cover against the cost of repair or replacement of defective parts, or to repair a material, assembly or manufacturing defect recognised by Ford
- Protection against unexpected repair bills
- All repairs will be carried out by Ford Authorised Dealers using genuine Ford parts

Ford Protect Service Plan Plus can be purchased any time up until the vehicle's first date of registration

Available Ford Protect Service Plan Plus plans:

Package 1	1 year/ 1 service, plus 25,000 miles Wear & Tear
Package 2	2 year/ 1 service, plus 25,000 miles Wear & Tear
Package 3	2 year/ 2 service, plus 50,000 miles Wear & Tear
Package 4	3 year/ 2 service, plus 40,000 miles Wear & Tear
Package 5	3 year 80,000 miles warranty/4 service, plus 80,000 miles Wear & Tear

Package 7	5 year 60,000 miles warranty/3 service, plus 60,000 miles Wear & Tear

## Notes and Conditions

- The length of your plan (and number of services on Service Plan Plus) applies from your new vehicle warranty commencement date, usually the date of first registration
- Time and mileage limits apply to all Ford Protect Plans
- Please contact your nearest Ford dealer for information on service intervals
- It is a condition of Ford Protect Service Plan Plus that your vehicle is serviced by an Authorised Ford Repairer according to the schedules in your Ford Service Portfolio
- In addition your Ford Service History Log must be kept up-to-date
- Subject to the terms and conditions of the Ford Protect Plans
- These Ford Protect Plans are transferable so it is an added benefit to the new owner if your decide to sell your vehicle
- The Extended warranty packages do not affect the Mach-E battery 8 year / 100,000 mile warranty
- Ask your Ford Dealer for full details of the Ford Protect Extended Warranty, Service Plan Plus and their associated Terms and Conditions or alternatively call Ford Protect on 03702 416726, Option 2, Option 2, or visit [www.ford.co.uk](http://www.ford.co.uk)

## OTHER PRICING CONSIDERATIONS

---

### Customer Order Price Protection

Ford's Price Protection Plan means that the price you pay is the same as the price on your order as long as you are prepared to accept delivery within three months, and in any event, as soon as your vehicle is available. Your Dealer has full details of the plan. Ford Motor Company Ltd is not liable for changes in price caused by Government changes in tax rates or changes in other applicable legislation.

### VAT

VAT is shown calculated at 20%. The total price of a vehicle, including factory fitted options and accessories fitted by the Ford Dealer, will be subject to VAT on retail sale.

### Price Changes

This price list outlines Ford's Recommended On The Road Prices and Recommended Retail Prices. Please contact your Ford Dealer for final sale prices. This price list is effective from Effective from 18th September 2020, and supersedes all previous price lists. The recommended prices in the publication were true and accurate at the time of printing. You should, however, check details with your Dealer as there may have been changes to Ford's recommended prices in view of Ford's policy of continuous development. Ford reserves its right to change prices at anytime. Change to government legislation or tax changes could result in a change to Ford's published prices.

## ILLUSTRATIONS, DESCRIPTIONS AND SPECIFICATIONS

---

The product information in this publication was correct at the time of going to print. However, Ford's policy is one of continuous product development. The right is reserved to change specifications and colours of the models and items illustrated and described in this publication at any time. For the latest details always consult your Ford Dealer. Throughout this publication, wherever a feature is described as being an 'Option' or 'Option Fitment/Pack' etc., you should assume that it will be at extra cost to the base vehicle, unless specifically stated to the contrary. All models and colour combinations are subject to availability.

Some images portrayed are of a pre-production model and/or are computer generated, therefore the design/features on the final version of the vehicle may differ in various respects. In addition, some of the features shown on the vehicles may be optional, e.g. metallic paint.

Please also note some driver assistance features and safety features described in this publication are designed to function using sensors, whose performance may be affected under certain weather or environmental conditions.
